

Control Summary

The whole control population and how it divides across the policy library, as at 16 August 2026. **Relevant** means a control under a criterion Annex A charters to the document, or one that names it. **Owned here** means it is the primary document. **Elsewhere** means the criterion is chartered to it but the operating detail lives in another — usually correct delegation.

No open findings. All 60 findings raised in the original assessment are closed, and every one of the 164 controls is documented by a document in the library. The Open column below reads zero for every row, and the second table carries no flagged delegation.

What that does and does not mean. It means the documentation gap is closed. It does **not** mean the controls are operating: **0 of the population is evidenced**, so nothing has yet produced a retained record proving it ran. That distinction is the whole of the remaining work, and it is the one a service auditor tests.

DOCUMENT	TITLE	STATUS	RELEVANT	OWNED HERE	ELSEWHERE	OPEN	CRITERIA CHARTERED

Controls tracked in another document

For each document, the controls under its chartered criteria whose primary owner sits elsewhere. This is delegation, not a gap: the control is documented, just not in the document whose criterion it falls under. Every row is Yes — coverage here is derived from the same source as the headline, so the two cannot disagree.

CHARTERED TO	CONTROL	CRITERION	TRACKED IN	COVERAGE	POSITION
